

## Override selection color for multiple selected text in HTML using CSS.

By Shariq Akhtar

Sometimes you would want to override the default text selection for multiple sections on a webpage. This could be easily done by using `::selection` Selector in your style sheet. For Firefox please add the prefix like `::-moz-selection`.

Below examples show how you can achieve this.

```
<!DOCTYPE html>
<html>
<head>
<style>
  body{
    font-family:'Segoe UI', Tahoma, Geneva, Verdana, sans-serif;
  }
  h3{
    width:100px;
    margin-bottom:-15px;
  }
  ::selection {
    background: transparent;
  }
  .yellow::selection, #example1 {
    color: #777;
    background: #F4FF1D;
  }
  .red::selection, #example2 {
    color: #fff;
    background: #FF682E;
  }
  .pink::selection, #example3 {
    color: #fff;
    background: #FB3AA5;
  }
  .green::selection, #example4 {
    color: #555;
    background: #6FFB64;
  }
  .blue::selection, #example5 {
    color: #fff;
    background: #00AEF0;
  }
  .purple::selection, #example6 {
    color: #fff;
    background: #9F53EF;
  }

```

```
}

/****For Firefox*****/
::-moz-selection {
background: transparent;
}
.yellow::-moz-selection, #example1 {
    color: #777;
    background: #F4FF1D;
}
.red::-moz-selection, #example2 {
    color: #fff;
    background: #FF682E;
}
.pink::-moz-selection, #example3 {
    color: #fff;
    background: #FB3AA5;
}
.green::-moz-selection, #example4 {
    color: #555;
    background: #6FFB64;
}
.blue::-moz-selection, #example5 {
    color: #fff;
    background: #00AEF0;
}
.purple::-moz-selection, #example6 {
    color: #fff;
    background: #9F53EF;
}
</style>
</head>
<body>
<h4>Please select text in the below examples.</h4>
<h3 id="example1">Example 1</h3>
